DOSATRON MOUNTING KIT FOR D8 & D3 BULK CONTAINERS

NETAFIM HAS DEVELOPED A MOUNTING KIT TO ENABLE FAST AND TROUBLE FREE FERTIGATION. FOR MORE EFFICIENT ON FARM OPERATIONS.

APPLICATIONS

- Small property fertigation
- Temporary systems
- Transportable systems
- Short term fertigation
- Emergency injection
- Local source fertigation
- Ideal for transportable systems
- Self-contained system complete with all hoses and connectors*
- Pest control applications

FEATURES & BENEFITS

- Designed to enable Dosatron units to be directly attached to IBCs (Intermediate bulk containers);
- Built in security feature (see inset on left) allows chain and padlock fixing to secure unit to container for added protection against theft*;
- Kits come supplied complete with non-return valves, inline filters, connection hoses and fittings;
- Easily transported and installed from site to site;
- Ability to inject fertiliser at source or at individual block locations;
- Canopy for added protection from UV and mechanical damage;
- Strong construction for added durability and protection.

* Does not include padlock and chain. Recommend use of 6mm padlock and 6mm chain.
